

Trademark Explorer Version 6.0 Released

The new version of Trademark Explorer enables a more convenient and user-friendly web interface on Trademark search. Improvements specifically concern the navigation in the display and the documents selection and exporting.

Enhancements of the Navigation in the Display

- Documents are now displayed using the navigation arrows to go to the previous or next documents.
- While displaying document, the “Result” tab remains available to go back to the Result Page containing the results table and the display options.

Enhancements of the Document Selection

- The new “Select all” and “Unselect all” links enable the user to select viewed documents and to display them in full format.
- Full format displays concern every selection from multiple databases and multiple pages.

Enhancements of the Document Exporting

- 5 formats are now available: TXT, PDF, RTF, XLS and XML.
- The presentation of RTF exported documents has been significantly improved.
- In French documents, the new “Trademark Table” template enables the user to export Trademark Name, Registration Number, and International Classes in a three column table.
