

Exceptional Growth Makes ITIP The World's Largest International Patent Filing Company

FORT GRATIOT, MICHIGAN, JANUARY 8, 2018.

ITIP LLC, the leader in IP cost management and international patent filing for the Fortune® Global 500, is pleased to announce that its trend of exceptional growth has continued with a sixth consecutive record year. ITIP remains the most relied upon corporate foreign filing solution in the IP industry today, resulting in ITIP's preeminent position.

"ITIP is the world's largest international patent filing company. No other company comes close" states ITIP's CEO, Tom Quinn. "For the past decade, ITIP has revolutionized international patent filings in much the same way that the annuity companies revolutionized payment of maintenance fees. In 2018, we anticipate processing nearly 10% of all corporate foreign filings originating from the USA."

A number of ITIP's Members have previously held Chief Patent Counsel positions for large multinational corporations. "At ITIP, we understand and speak the corporate legal department language" says ITIP Member, Roger Gobrogge, who was Head of IP for Rolls-Royce Americas and Chief Patent Counsel for Dow Corning prior to joining ITIP. "To efficiently manage the cost of international filings, it takes more than promises of a penny per word less on translations or a line item discount on invoices" explains Gobrogge. "At ITIP we provide comprehensive solutions that manage cost and compliance throughout the patent life cycle. Knowing and addressing in-house counsel's cost management concerns earns their trust and the privilege of working with the largest corporate filers in the world".

ITIP's innovative solutions provide complete transparency into the cost management of IP law firms and international agents. Bringing together a unique vision that combines proprietary best practices, state of the art IT technology and IP human resources, ITIP has a variety of proven solutions for large companies to cut through waste and eliminate unnecessary cost.
