

# SDI Profiles Available on all Questel•Orbit Trademark Databases!

You can now create SDI profiles on all Trademark databases.

A SDI profile allows you to save a search strategy on the Questel•Orbit service for surveillance purposes. This strategy will be regularly executed by Questel•Orbit, and the results automatically sent out to you by post or by e-mail.

This leaflet outlines the commands necessary for saving and managing profiles on Questel•Orbit.

## **Saving profiles\* with results sent by mail:**

<b>SDI Profile Name</b>	Saves a profile (30 characters for the name) with results sent in MAX format
<b>SDI Profile Name;AD</b>	Saves a profiles with results sent to an alternate postal address
<b>SDI Profile Name;PR IMG</b>	Saves a profile with results sent in MAX format including image
<b>SDI Profile Name;PR Format Name</b>	Saves a profiles with results sent in an alternate format
<b>SDI Profile Name;PR Format Name IMG</b>	Saves a profiles with results sent in an alternate format including image

## **Saving profiles\* with results sent by e-mail:**

<b>SDI Profile Name EMAIL</b>	Saves a profile (30 characters maximum for the name) with results sent in MAX format
<b>SDI Profile Name EMAIL;SET</b>	Saves a profiles with results sent to an alternate e-mail address
<b>SDI Profile Name EMAIL RTF;PR IMG</b>	Saves a profile with results sent in MAX format including image
<b>SDI Profile Name EMAIL;PR Format Name</b>	Saves a profiles with results sent in an alternate format
<b>SDI Profile Name EMAIL RTF;PR Format Name IMG</b>	Saves a profiles with results sent in an alternate format including image

\* In cluster mode (multi-file searching), it is necessary to specify the database name in which the SDI will run, using the FROM parameter.  
Example: SDI NEW FROM CTMARK

**NEW !**

## **SDI Profiles Available on all Questel•Orbit Trademark Databases!**

### **Saving addresses:**

<b>AD</b>	Saves your postal address
<b>SET EMAIL</b>	Saves your e-mail address

### **Managing profiles:**

<b>SHOSDI</b>	Lists all your SDIs
<b>SHOSDI Profile Name</b>	Displays the search strategy saved in a SDI
<b>EX Profile Name</b>	Runs a SDI as a saved search
<b>PURGESDI Profile Name</b>	Deletes a SDI

## **Choose your Frequency! Exclusive on Trademark Databases**

The implied running frequency of a SDI profile corresponds to the frequency of the database update.

When creating a SDI profile on Trademark databases, you can now choose the frequency of your profile execution.

### **For databases with weekly updating (FMARK, TMINT, CAMARK and USMARK) :**

<b>Implied Frequency</b>	Runs the profile weekly
<b>SDI Profile Name;SURV BIM</b>	Runs the profile twice a month
<b>SDI Profile Name;SURV MON</b>	Runs the profile once a month

### **For databases with bimonthly updating (CTMARK and all the databases from Compu-Mark) :**

<b>Implied Frequency</b>	Runs the profile twice a month
<b>SDI Profile Name;SURV MON</b>	Runs the profile once a month

For additional information regarding these features,  
Please contact your local Help Desk or Questel•Orbit representative.
