Specifications on some search fields:

- Design Number: GB doesn't have any multi-design applications.
- Priority Information: The UK IP Office doesn't provide more than the priority date. Hence, the lack of a priority number is due to the authority.

Classification:

The UK uses its own National class system in the following format: 06-01-01A.

Example: Beds and divans: 06 (class) 06-01 (subclass) 06-01-01 (main group) 06-01-01A (group)

The Locarno Class representation (xx-yy, where x is class and y subclass to be consistent with other countries systems) has been derived from this notation. The full class is indexed under GB National Class New Grants; Correction of Errors and Renewals are systematically updated. Change of address information is only updated at the time of other legal status event changes. In any event, it is recommended to use the link to the full Patent Office record to have the most current legal status event information.

Remarks: For a comprehensive search of all industrial designs having effect in Spain, we recommend a search covering **UNITED-KINGDOM**, and **EUROPE** registers.
