

Watch Services

We'll comb the world for your patent information

Patent Alerts - SDIs

- Watch the markets - competitors, partners, infringers, activities in your technology - in more than 90 countries
- Retrieve, search and manage your alert results in your portfolio
- Ideal for professionals who need to monitor a technology or a competitor

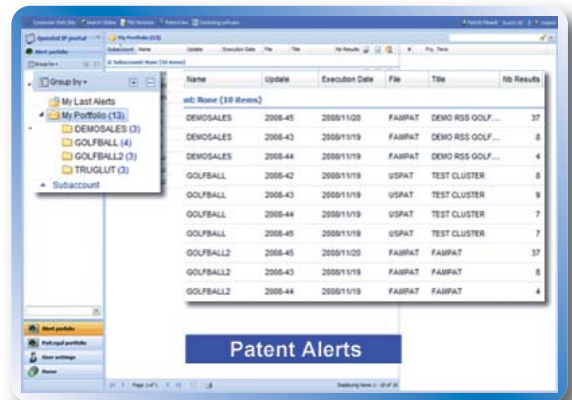

Legal Status Alerts - PatLegal Monitor

- Automatically monitor any changes made to patent families, legal status and file histories from 8 patent offices (and growing)
- Keep track of the main office's action: EP, DE, CA, CN, FR, JP, KR, UK, US (and growing)
- Value quickly results with color codes to highlight any new, modified or deleted actions
- For Law Firms and Patent Information professionals who wish to save precious time by outsourcing the checking of patent families and their legal status

Set up, delivery and advantages

Fully integrated into orbit.com, the alerting services are very easy to set up, consult, modify and manage directly in your portfolio.

- run alerts weekly or monthly (or even choose a different update code)
- receive results when an abstract is available only
- refine or expand the strategy of existing alerts
- designate very easily the workfile module to store, analyse, rate, annotate alert results, attach documents and share everything or selected workfiles with your colleagues
- choose to not receive email notification when an alert run shows no result
- choose to not receive emails at all and consult results through the portfolio only

All alert results now also contain, at no additional cost:

- a link to the patent copy in pdf (or to each family member's if a family is available)
- a link to the mosaic of all drawings in pdf
- a link to the available registers when available (CA, CN, EP, GB, KR, US, WO...)
- a link to the dynamic citation graph (showing cited and citing references)
