Orbit Capture

IP 360° PLATFORM

The essential monitoring workflow to stay in control of your IP portfolio.

WHO ARE WE?

Developed by the Questel in Paris, Orbit Capture is a Legal Tech solution for managing intellectual property assets and contracts. Our team is composed of experts with complementary expertise in intellectual property, design and engineering.

OUR MISSION

We found that no intellectual property professional was satisfied with the solutions used. None of the solutions offered an intuitive and user-friendly interface that addressed the complexity of intellectual property. No solution centralized title data and data from exploitation and collaboration contracts in a single tool.

Orbit Capture was born.

Our mission: to transform a complex environment into an optimal user experience whether you are an expert or a neophyte in intellectual property.

STEP 1

Design an intuitive solution

Our tool manages the complexity of intellectual property thanks to an ultra intuitive platform that adapts to the structure of your organization and integrates the interlocutors of the intellectual property chain. Priority is given to the experience of our users. Our credo: ease, flexibility and reliability.

STEP 2

Developing powerful technology

Our team of engineers develops powerful tools designed to constantly adapt to changes in your organisation. This complexity is managed through agile technology that adds flexibility to the product. Each organization has a unique pattern with its own complexities that we manage individually.
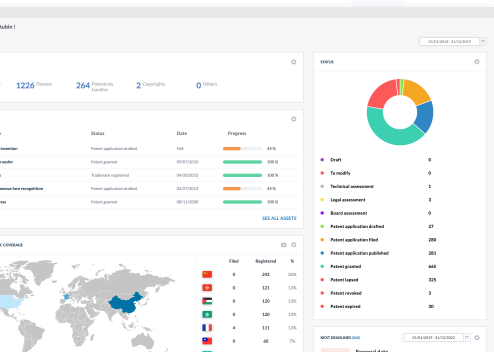

STEP 3

Building a human relationship

Because technology alone is not enough, we are constantly exchanging with our users to better understand their needs and satisfy them. For each problem, a solution adapted to each one.

DASHBOARD

Access an overview of your portfolio broken down into subsidiaries, technologies or product lines. With a simple click, reload the page with the data of the desired entity. On-demand reporting becomes very simple.

PORTFOLIO

Search your assets grouped into families among all types of assets (patents, trademarks, designs, copyrights and domain names. Filters allow you to search the portfolio according to selected criteria. Export your data to Excel at any time.
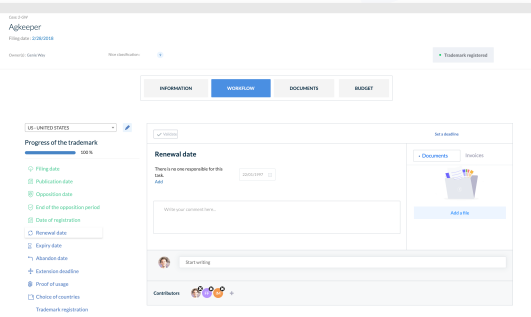

BUDGET MONITORING

Allocate budgets to different targets such as a family or a subsidiary and be notified of budget overruns. Centralize your invoices around a task unit in your asset roadmap.

Other features

- Unlimited assets

- Orbit Intelligence automatic update

- Multi-entity management

- Rights and user management

- Collaborative Task Manager

- Budget follow-up and invoice validation

- Library

- Automatic asset addition

- Reminder of deadlines
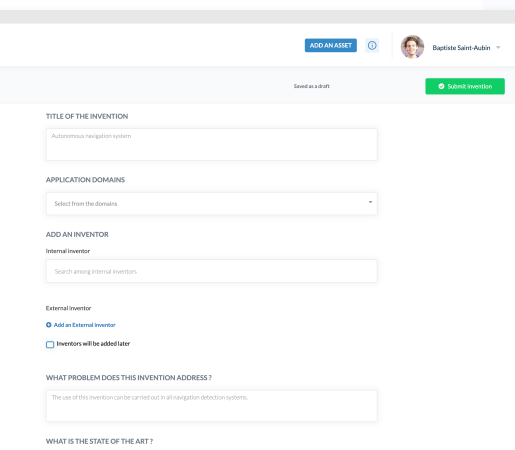

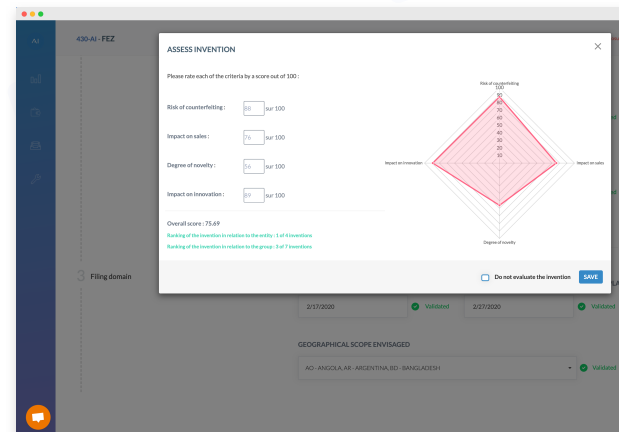

- Exporting data

- Personalized email alerts

WORKFLOW

The workflow tool allows you to manage workflows according to your business units. Define who can validate steps, invite contributors and schedule reminders on tasks. It is also possible to track the time spent on a task (CIR declarations).

EVALUATION OF INVENTION APPLICATIONS

Technical experts can evaluate new invention applications. Adjust evaluations during portfolio reviews to historically track the evolution of the invention. Each evaluation criterion is configurable in your administrator area.

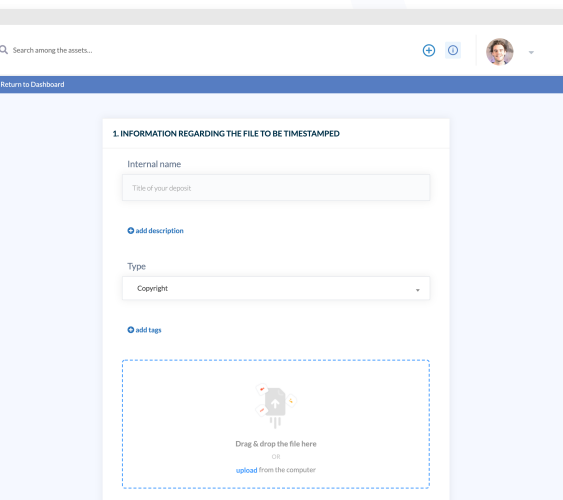

INVENTION DISCLOSURE PROCESS

Capture the R&D activity of your engineers and inventors from the beginning of the innovation cycle to effectively protect their creative output. Launch a semantic search on the content of the invention to obtain the 25 most relevant patents.

THE BLOCKCHAIN TIMESTAMP MODULE
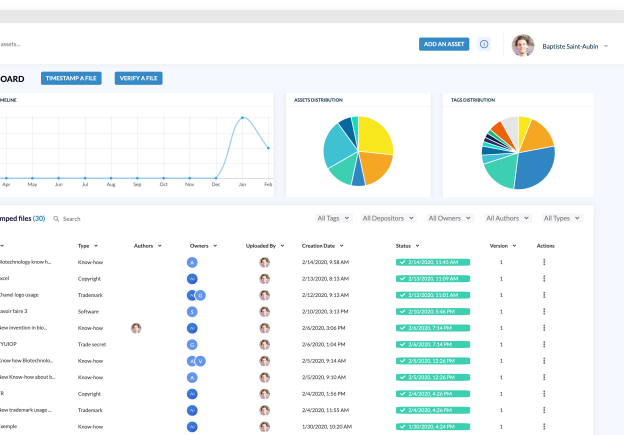

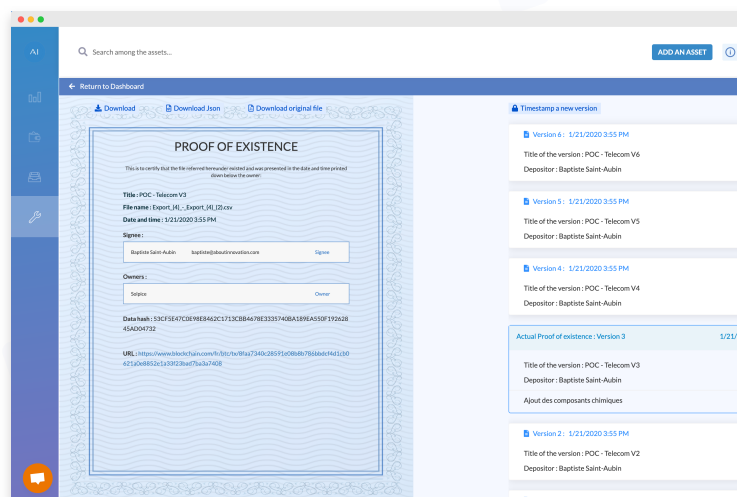

List of included features

TIMESTAMPING OF DOCUMENTS

All you have to do is drag and drop your document, whatever its size or format, complete the information and manage any co-holders. With one click, your document is time-stamped on the Bitcoin Blockchain.

CERTIFICATE OF PROOF

Get your proof of existence certificate in a few minutes. Organize the traceability of the creative or inventive process in your organization by grouping your certificates in a dedicated library.

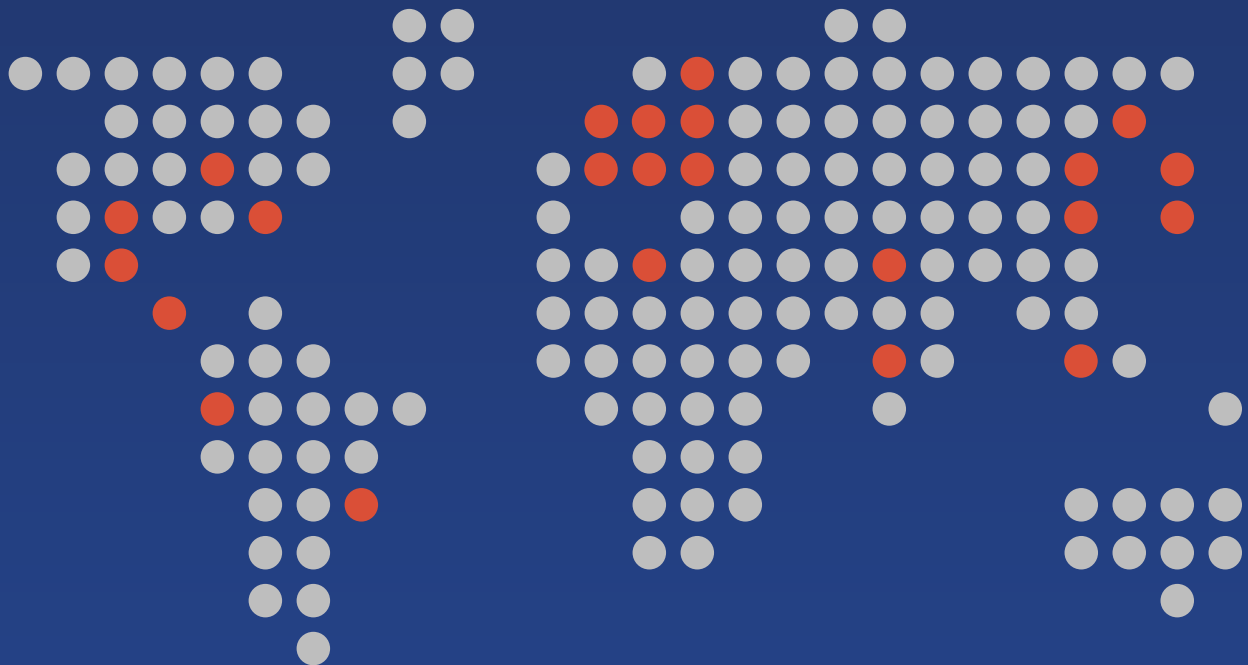

TIMESTAMP DASHBOARD

Track the history of your timestamps by business unit and by manager. Search by depth to find an item. Easily export graphical performance indicators.

Other features

- Versioning
- User access management
- Certificate of Proof of Existence in PDF format
- Verification of evidence from original documents
